

## MINNESOTA CITY/COUNTY SUMMARY BUDGET DATA FORM INSTRUCTIONS

Minnesota Statute § 6.745 requires all Minnesota cities and counties to provide summary budget data to the Office of the State Auditor at the time they approve their budgets. This information helps state policymakers identify overall trends in revenue and spending decisions. It also can help local officials compare their own budget trends with the trends of similar entities.

In an effort to make reporting easier and more convenient, the Office of the State Auditor has put the Minnesota Summary Budget Data Form online. You can access the online reporting form by visiting the State Auditor's website at <https://safes.osa.state.mn.us>. Your User ID and Password will give you access to only your reporting information.

Please submit the information to this office by **January 31, 2022**.

**Data is saved only when you click on the "Previous" or "Next" buttons. After entering and finalizing the budget numbers you will need to click on the "Complete Form" button to submit the information. Once the information is submitted, you cannot make any changes to the form without contacting the Government Information Division.**

If you have questions or require assistance in completing this form, please email the Government Information Division at [GID.OSA@osa.state.mn.us](mailto:GID.OSA@osa.state.mn.us) or call (651) 297-3682. Thank you in advance for your cooperation.

### **Budget Data to be Included**

Local officials are asked to summarize their budget data for all **Governmental Funds** for which annual budgets are approved, including the general fund, special revenue funds, debt service funds, and capital projects funds. Please indicate at the top of the form which funds are included in the Summary Statement. If an annual budget is approved for a Governmental Fund (including those of blended component units), that budget should be reflected on the Summary Statement. Please do **not** include budget data for proprietary or fiduciary funds on the Summary Budget Data Form.

### **Budget Reporting Columns**

You will note there are three columns of budget data requested. The **first column** is pre-populated with the 2021 (prior year) original budget data as submitted last year. The **second column** is also pre-populated with the 2021 original budget data, but should be changed as needed to reflect your 2021 final budget as amended. The inclusion of the second column is intended to give officials an opportunity to show any approved budget adjustments that may have occurred between the adoption of the 2021 budget in late 2020 and the close of the 2021 calendar year. The **third column** requests 2022 proposed budget data as adopted in November or December of 2021. There must be a value on each line of the 2021 final budget and 2022 proposed budget data column (either a zero or an amount budgeted for that category) before you can move to the next page.
