2019 City Performance Measurement Program Results (Data from 2015-2019, Unless Otherwise Noted)

Background

In 2010, the Minnesota Legislature created the Council on Local Results and Innovation (CLRI). Currently, the CLRI has a standard set of 27 performance measurements for counties and 29 performance measurements for cities that they believe will aid residents, taxpayers, and state and local elected officials in determining the efficacy of counties and cities in providing services. Participation in the standard measures program by a city or a county is voluntary. Cities and counties that choose to participate in the standards measure program may be eligible for funding of 14 cent per capita from the State of MN.

The Apple Valley City Council chose to participate in the program for the 2019 reporting year. In order to receive the per capita reimbursement for the following calendar year, cities must adopt and implement a minimum of ten performance measures from the CLRI's list of 29 measures and file a report with the Office of the State Auditor.

The measurements are divided into six different categories: General, Police Services, Fire & EMS Services, Streets, Water, and Sanitary Sewer. As part of this process, the City submitted five years of data (generally 2015 to 2019, sometimes 2015 to 2018) for 15 of the 29 standard performance measurements, which were selected from each of the six categories. Below are the data related to each of the measurements the City chose to track.
