4. PERA reports print only those employees with PERA withholdings.

5. Posted payrolls can be deleted.

6. The inkjet/laser check printing has been moved down.

7. Object codes are printed on the disbursement registers.

8. The skipping of checks using dot-matrix printers has been corrected.

9. The account distribution error when posting the payroll to disbursements has been corrected.

10. Receipt and disbursement registers will print correctly when a specific fund is selected.

11. The receipt and disbursement ledgers have been updated so all accounts will print.

12. The cumulative wages and withholdings shown on the bottom of the payroll check will now be correct.

The update includes only those changes that fit within the original scope of the reformatting project.
