(a) Data on Life Expectancy come from the National Center for Health Statistics (NCHS) through the National Vital Statistics System (NVSS). The most recent data available are two to four years prior to the reporting date, and are therefore estimates of the current Life Expectancy at birth.

(b) There are multiple family and system related factors that can affect the maltreatment recurrence performance measure. Our Federal Standard for this is to be less than 9.1%. The state average is 9.0%. Factors could include but not limited to: specific type of allegations being reported, efforts to decrease placement, increased drug use by families, etc.

(c) Data for 2023 and 2024 has been updated.
