RESOLUTION NO. 2017-02

STATE OF MINNESOTA
COUNTY OF ANOKA
CITY OF CIRCLE PINES

Resolution Authorizing Participation in State Performance Measures and Continuation of the Ten City Performance Measures of the Local Results and Innovation Council

WHEREAS, Benefits to the City of Circle Pines for participation in the Minnesota Council on Local Results and Innovation’s comprehensive performance measurement program are outlined in MS 6.91 and include eligibility for a reimbursement as set by State statute; and

WHEREAS, Any city participating in the comprehensive performance measurement program is also exempt from levy limits for taxes, if levy limits are in effect; and

WHEREAS, The City Council of Circle Pines has adopted and implemented at least 10 of the performance measures, as developed by the Council on Local Results and Innovation, and a system to use this information to help plan, budget, manage and evaluate programs and processes for optimal future outcomes; and

NOW THEREFORE LET IT BE RESOLVED THAT, The City Council of Circle Pines will continue to report the results of the performance measures to its citizenry by the end of the year through publication, direct mailing, posting on the city’s website, or through a public hearing at which the budget and levy will be discussed and public input allowed.

BE IT FURTHER RESOLVED, The City Council of Circle Pines will submit to the Office of the State Auditor the actual results of the performance measures adopted by the city.

Adopted this 13th day of June, 2017 by the City Council of the City of Circle Pines.

City Survey Results
How is the City of Circle Pines Performing?

The City Council has committed to participating in the state performances measures and adopting ten city performances measures of the local results innovation council. As a part of the initiative, the city conducted this survey online for residents to respond to. We will continue to survey and track our performance to make improvements. The current results are consistent with our past positive survey results. The results of the survey are as follows.

How would you rate the overall appearance of the city?
29% Excellent
59% Good
11% Fair
21% Poor
0% Don't Know

How would you describe your overall feeling of safety in the city?
73% Very Safe
24% Somewhat Safe
2% Somewhat Unsafe
1% Very Unsafe
0% Don't Know

How would you rate the overall quality of fire protection services in the city?
37% Excellent
33% Good
1% Fair
0% Poor
29% Don't Know

How would you rate the overall condition of the city streets?
14% Excellent
66% Good
16% Fair
4% Poor
0% Don't Know

How would you rate the overall quality of snowplowing on city streets?
28% Excellent
52% Good
11% Fair
3% Poor
7% Don't Know

Rationale

Standard & Poor's Ratings Services assigned its 'AA' long-term rating to Circle Pines, Minn.'s series 2016A unlimited-tax general obligation (GO) capital notes and 2016B unlimited-tax GO bonds. At the same time, we affirmed our 'AA' long-term rating on the city's GO debt outstanding. The outlook is stable.

The city's full faith, credit, and resources and its unlimited property tax pledge secure the bonds. Bond proceeds for the 2016A will be used for telecommunications equipment and bond proceeds for the 2016B will be used for various street and utility improvements. We understand that the city has also pledged special assessments though our rating is based on the unlimited tax pledge.

The rating reflects our view of the city's:

- Strong economy, with access to a broad and diverse metropolitan statistical area (MSA);
- Strong management, with good financial policies and practices under our Financial Management Assessment (FMA) methodology;
- Strong budgetary performance, with operating surpluses in the general fund and at the total governmental fund level in fiscal 2014;
- Very strong budgetary flexibility, with a high available fund balance in fiscal 2014 of 131% of operating expenditures;
- Very strong liquidity, with total government available cash at 3.8x total governmental fund expenditures and 11.2x governmental debt service, and access to external liquidity we consider strong;
- Weak debt and contingent liability position, with debt service carrying charges at 34.4% of expenditures and net direct debt that is 352.8% of total governmental fund revenue, but rapid amortization, with 82.2% of debt scheduled to be retired in 10 years; and
- Strong institutional framework score.

Strong economy

We consider Circle Pines' economy strong. The city, with an estimated population of 5,008, is located in Anoka County in the Minneapolis-St. Paul-Bloomington MSA, which we consider to be broad and diverse. The city has a projected per capita effective buying income of 119% of the national level and per capita market value of $71,174. Overall, the
city's market value grew by 2.1% to $356.4 million in 2015. The county unemployment rate was 4% in 2014.

Circle Pines encompasses an area of 2.3 square miles and is approximately 15 miles north of St. Paul. The city's tax base is primarily residential (91%) with a small portion coming from the commercial/industrial sector (8%). The leading employer in the city is the local school district, which employs roughly 1,000 people. Additional employment opportunities are available to residents of the city in St. Paul given the close proximity. Taxable value has increased by 15.6% since the 2013 valuation. Management expects that the increase will continue, and based on the trend we believe this to be likely.

**Strong management**

We view the city's management as strong, with good financial policies and practices under our FMA methodology, indicating financial practices exist in most areas, but that governance officials might not formalize or monitor all of them on a regular basis.

Management highlights include:

- Use of three to four years of historical information with help from outside sources to include the state and a line-by-line approach to budgeting,
- Semiannual reporting of budget-to-actual results with the ability to amend the budget as needed,
- No formalized long-term financial plan,
- Five-year long-term capital plan that is updated at least every other year with sources and uses of funds identified,
- Formal investment management policy with annual reporting of investments and holdings,
- Formalized debt management policy that is more restrictive than state guidelines and contains restrictions in using variable-rate debt and derivative-based debt, and
- Formalized fund balance policy to maintain reserves at 55% of the upcoming year's budgeted expenditures for cash flow needs.

**Strong budgetary performance**

Circle Pines' budgetary performance is strong in our opinion. The city had operating surpluses of 11.3% of expenditures in the general fund and of 9.5% across all governmental funds in fiscal 2014. Our assessment accounts for our anticipation that budgetary results could deteriorate somewhat from 2014 results in the near term.

We made our calculations after adjusting the city's one-time capital expenditures. For fiscal 2014 (ended Dec. 31) the city budgeted for break-even operations but ended the year with a positive variance and added $255,000 to reserves, which management attributes to lower-than-budgeted expenditures. For fiscal 2015 the city adopted a balanced budget. Unaudited results for 2015 depict an operational surplus of $399,843. Management attributes this variance to lower-than-budgeted expenditures mainly stemming from a purchase of fire equipment that may later be bought under a grant. Management anticipates ending 2015 with at least break-even results from a total government fund standpoint. For fiscal 2016 the city has budgeted for break-even results for the general fund. We understand that the city anticipates an increase in public safety as it transitions to a two-city fire district and is budgeting for a replacement of street lighting. Based on these increases in expenditures, coupled with the current budget, we believe the city will likely maintain budgetary performance that is strong though not as strong as in fiscal 2015.
Very strong budgetary flexibility
Circle Pines' budgetary flexibility is very strong, in our view, with a high available fund balance in fiscal 2014 of 131% of operating expenditures, or $3 million. We expect the available fund balance to remain above 75% of expenditures for the current and next fiscal years, which we view as a positive credit factor. Over the past three years, the total available fund balance has remained at a consistent level overall, totaling 128% of expenditures in 2013 and 125% in 2012.

Although the city has assigned a majority of the fund balance, we understand that it has the flexibility to reallocate these assigned fund balances if need be for operational purposes. Based on the current budget, minimal capital needs, and historical ability to outperform the budget, we expect budgetary flexibility to remain very strong and above 75%.

Very strong liquidity
In our opinion, Circle Pines' liquidity is very strong, with total government available cash at 3.8x total governmental fund expenditures and 11.2x governmental debt service in 2014. In our view, the city has strong access to external liquidity if necessary.

We believe that the city has strong access to external liquidity, as it has issued GO and revenue-backed debt, which demonstrates access to capital markets. We expect the city's cash position, with respect to its total governmental expenditures and debt service, to change little during the next two years and remain very strong. We understand that the city has no potential contingent liabilities that could have an adverse impact on its cash position. The city maintains investments in highly rated securities and has a formalized investment management policy, so we do not view its investment strategies as aggressive.

Weak debt and contingent liability profile
In our view, Circle Pines' debt and contingent liability profile is weak. Total governmental fund debt service is 34.4% of total governmental fund expenditures, and net direct debt is 352.8% of total governmental fund revenue. Approximately 82.2% of the direct debt is scheduled to be repaid within 10 years, which is in our view a positive credit factor.

The debt profile does not include revenue debt and debt fully self-supported by the city's enterprise funds. The city plans to issue an additional $3.5 million for street repair in 2018. Also, management has confirmed that it does not have any alternative financing.

Circle Pines' pension contributions totaled 1.9% of total governmental fund expenditures in 2014. The city made its full annual required pension contribution in 2014.

The city covers all full-time and certain part-time employees by defined benefit plans administered by the Public Employees Retirement Assn. of Minnesota (PERA). PERA administers the General Employees Retirement Fund, a cost-sharing multi-employer retirement plan. We understand the city has no financial obligations related to other postemployment benefits.

Strong institutional framework
The institutional framework score for Minnesota cities with a population greater than 2,500 is strong.
Outlook

The stable outlook reflects our view that the city will maintain its very strong budgetary flexibility, and as such we do not expect to change the ratings within the two-year outlook period. The city has been able to maintain strong budgetary performance, so we expect that it will continue to address any potential budgetary pressures to maintain fiscal balance and reserves that are very strong.

Upside scenario
A higher rating is possible if the city’s economic profile were to improve to levels commensurate with those of higher-rated peers, which could occur if the city’s income level and market value per capita were to increase coupled with a decrease in overall debt burden, or if the city were to run a budgetary surplus of more than 5% on a sustained basis with all other factors remaining constant.

Downside scenario
A lower rating is possible if the budgetary performance were to decline to a level we view as weak or very weak, causing a significant deterioration in the city’s budgetary flexibility. Based on historical performance, we do not view that as likely.
